

Our Pet Soap combines **Propolis and Honey** in a pure vegetable based soap. This all natural soap does not dry out your animal's skin and will leave their coat looking healthy and shiny.

#### HOW TO USE

Simply wet and work soap into a lather using your hands all over your animal's coat, then rinse. Avoid the eye and nose area. Use regularly to keep your pet's coat healthy and clean.

Suitable for all animal types from dogs and cats to horses!

This soap bar is environmentally friendly with less packaging and waste.

#### WHAT IS PROPOLIS?

Propolis is a resinous substance bees make to seal, disinfect, and protect their hive.

Because of its antibacterial, antifungal, antiviral, anti-inflammatory and antioxidant properties, 'bee glue' as it is also known, can assist the body in fighting viral, bacterial and fungal infections whilst also soothing the skin

A dog's skin in particular has a very thin epidermis making it susceptible to bacteria and skin infections. Propolis soap can be used to aid the treatment of these skin irritations and infections by removing the unwanted bacteria from the surface of your pet's skin.

Propolis may help ward off viruses such as canine flu and kennel cough and can help protect against fleas and ticks. Propolis can also be used to aid the healing of minor cuts and wounds.

While Propolis provides the natural antibacterial activity, **Honey**, with its complex composition of nectar and enzymes, minerals and chlorophyll derivatives will moisturise and hydrate. The **Sandalwood oil** provides a refreshing fragrance.

*Ingredients: Sodium Palmate, Sodium Palm Kernelate, Aqua, Glycerine, Honey, Propolis Extract, Sandalwood Oil, Palm Kernel Acid, Pentasodium Pentetate, Hydroxy Ethylidene Diphosphonic Acid (HEDP), Tetrasodium Etridonate (EDTA)*
